

I have successfully completed a 2-years Master Degree in International Business and Management at Shanghai Jiao Tong University. The courses, including in-depth change management as well as Chinese language studies, that I undertook during these years have provided me with an excellent foundation to pursue my professional career and to achieve ambitious goals I have set for my future. What this experience also provided me with was the opportunity to get practical experience from working and communicating in multi-cultural teams. I was very honored to receive the Svenska Skolan I Beijing's Scholarship, as it supported me to cover the full tuition fee for this 2-year program. To be able to graduate from Shanghai Jiao Tong University, being a world-renowned University, is something I will always be very proud of. I strongly believe that the high quality of the education provided at SJTU, combined with its strong brand, will be a mark of excellence in my CV - which I am convinced to be beneficial regardless of the industry I am in. However, not only has the content of the program itself contributed to who I have become, also who I strive to be. In addition, by studying and living in China I have had the chance of getting a close-up experience of an extremely diverse and rich culture. I am convinced that this is will always remain an essential part - that has, and will, enable me to build a solid platform from which I can pursue my dream of an international career. I will always stay grateful for this chance.
